

Contour®

Operators

The Contour hardware system was designed for commercial casement and awning windows. Contour is composed of locks, hinges, and operators designed to complement one another both aesthetically and functionally. You will notice the smooth design has a contemporary feel with softened edges that allow the hardware to blend seamlessly into the window. The Contour operator has increased load-carrying capacity and 22% more operating leverage for ease of operation.

PRODUCT HIGHLIGHTS

- Design improves ease of operation and supports ADA force requirements
- Integrated gasket enhances weather resistance
- Concealed fasteners improve interior aesthetics
- Handle is offset to provide increased clearance of side extension jambs technical specifications
- Casement sash load carrying capacity is 100 lbs. (36" X 60")
