

Encore[®]

Operators

Designed as an integrated system, Encore operators and locks provide unmatched elegance and performance. Encore operators give you all the strength and performance characteristics of Maxim[®] but with the flexibility of a snap-fit cover and streamlined full-flip folding handle that eliminates collapse during operation. Encore operators require 33% less effort to operate than previous operators and are designed to use the same mounting location as the Maxim system. These operators complement the Encore multi-point locking system. The Encore family of operators is arguably the industry's best value in window hardware.
