

Maxim[®] ADA

Locks

The Maxim[®] ADA lock offers the same great performance as the traditional Maxim sash lock but features a larger handle to help make operation easier for those with limited ability. The Maxim[®] ADA lock utilizes an industry-standard cut-out that generally requires no tooling. Not only will you appreciate the ease of switching locks, you will also enjoy the easy-to-operate design.

The Maxim ADA integrates beautifully with vinyl, composite, and aluminum windows and complements the all-encompassing Maxim window hardware platform.

PRODUCT HIGHLIGHTS

- Helps window to meet ADA requirements
- Quick and easy installation, with industry-standard cut-out that generally requires no tooling
- Non-handed lock design
- Offered in both single-point and multi-point (short, medium and long)
- Pairs seamlessly with the large Maxim tie bar that is available in steel and stainless steel
- The lock-to-tie bar attachment makes installation fast and easy. Maxim's "zippered locking effect" assures engagement of the top lock point. With .625" of reach-out capability, the window can be locked without being completely closed.
- Closed operating system minimizes the opportunity for air, water, light, and insect intrusion
