

Maxim LP[®]

Locks

The Maxim LP lock offers the same great performance as the traditional Maxim sash lock but features a unique low-profile design that extends less than ½" into the home. The new streamlined design sports a crisp modern look while minimizing interference with window treatments.

The Maxim LP lock utilizes an industry-standard cut-out that generally requires no tooling. Not only will you appreciate the ease of switching locks, but you will also enjoy the low profile, easy to operate design. The Maxim LP integrates beautifully with vinyl, composite, and aluminum windows.

PRODUCT HIGHLIGHTS

- Contemporary styling
- Low-profile (LP)
- Reduced operating force
- Non-handed design offers reliability with up to 20% less operating force
- Offered in both single-point and multi-point (short, medium and long)
- Pairs seamlessly with the large Maxim tie bar that are available in steel and stainless steel
- Quick and easy installation, with industry-standard cut-out that generally requires no tooling
- The lock-to-tie bar attachment makes installation fast and easy. Maxim's "zippered locking effect" assures engagement of the top lock point. With .625" of reach out capability, the window can be locked without being completely closed.
- Closed operating system minimizes the opportunity for air, water, light, and insect intrusion
