

# Roll Form Tie Bar

As part of Quanex Hardware Solutions for the fenestration market, we are proud to introduce our new stainless-steel C-channel Roll Form Tie Bar with adjustable lock points. Designed for efficiency, it features patented base guides with locating tabs for easy factory installation and a non-handed design to minimize inventory. This cost-effective solution is manufactured in Canada, specifically for the Canadian market, ensuring your business stays on track.

## DETAILS

- Available in 4" size increments from 14.9" (378 mm) to 86.9" (2,207 mm) for casements, 9.17" (233 mm) for awnings
- Contain 2-4 sequential locking points based on tie bar length
- Self-locating keepers and guides simplify factory installation
- Non-handed design reduces the number of inventoried parts
- Stainless steel components for corrosion resistance
- Stainless steel adjustable rivets allow field adjustments over time
- Complements AmesburyTruth's Maxim LP® locking solution
