

V300

Hinges

A "maintenance and noise-free" operation by incorporating an internal polymer bushing to eliminate any metal-to-metal contact. A solid extruded jamb wing allows for higher hinge carrying capacity with an integrated hinge pin to provide security for outswing and inswing doors - will not lift during normal door operation. Stainless steel adjustment screws provide superior corrosion resistance.

PRODUCT HIGHLIGHTS

- Horizontally adjust 1/16" further than most hinges on the market
- Hinge system adjust 1/4" vertically and horizontally
- Extremely low adjustment force by vertically adjusting the door from below, not laterally like other hinge designs
- All hinges adjust both horizontally and vertically
- Provides an easy-to-see indicator line for accurate vertical adjustment
- Hex head adjustment screws, not phillips or slotted, to provide secure tool engagement and prevent stripping during adjustment
- Design for Style
- Available in steel and brass substrates
- Industry standard powder paint colors
- Matching mounting screws available to blend perfectly with hinges
