

## Zinc Snubber

### Accessories

Snubbers prevent bowing of tall casement windows, or wide awning windows and have been found to be useful with double-hung windows in improving the seals of the bottom and top rails in the closed position. For use with concealed or exposed hinges, concealed Snubbers fit between the sash and frame in a hinge cavity and is not visible on the exterior of the window. A PVC insert feature is available for use on aluminum clad units and reduces wear on the clad finish.
