LOCKS

Sentinel

The Sentinel is home-owner friendly with superior stainless steel performance and dependable security.

product highlights

- Concealed hardware Innovation
- Delivers a premium door edge appearance
- Lowest operating force by eliminating the need for multiple face plate mounting screws
- Rod lengths can be processed in-line to fit custom panel heights
- Eliminates face plate extensions to provide system savings
- Made from the finest 300 series stainless steel for superior corrosion resistance
- Incorporates the “Baby-Sitter Effect” that allows the consumer to operate the dead bolt and extension bolts independently of each other, eliminating the necessity for the consumer to lift the lever handle and engage the shoot bolts before activate the dead bolt
- Incorporates an “Anti-Slam” device that prevents the lock bolts from extending until the door is in the closed position, eliminating the potential for door frame damage by the consumer
- The shoot and dead bolts extend a full one-inch to meet the highest levels of structural testing, and meets most local building codes
- Available with 14-20 or 5/16-18 rod connectors
