## LOCKS

### Positive Action Lock 19.63 Series

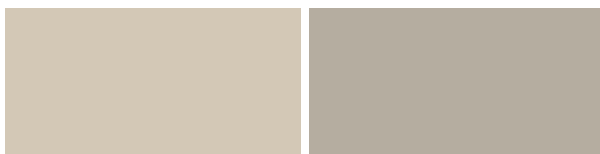

The 19.63 series lock design is available with an easy slide tab design. A simple movement of the locking tab disengages the lock allowing the sash to move freely and automatically relocks upon closing the window.

#### Product Highlights

- Recommended for: aluminum, composite, vinyl, and wood
- Quickly and easily unlocked by using the finger pull on the top cover
- Automatically relocks when the window is closed
- Improved aesthetics with 13385.XX snap on cover that conceals the mounting screws
- Text is located under the pull on the lock to indicated an un-locked condition when the lock bolt is retracted
- Audible click gives feedback when the window is being locked or unlocked
