Product Highlights

- Ideal for Multiple Door Types: Perfect for vinyl, aluminum, fiberglass, and steel sliding doors.
- Flexible Mounting Options: Housing assembly includes end tabs for mounting, just like side adjust rollers. Choose from standard, reverse, or mid-range mounting tabs for the best fit.
- Customizable Fit: Add spacers to increase roller height for larger profile sizes, providing a perfect match for your specific door.
- Precision Engineering: .68" body width with variable housing heights, depending on tab type and spacer inclusion, and .43" of adjustment for the perfect glide.
- Ready to Install: Pre-adjusted to fully retracted, these rollers are ready to go straight out of the box.
- Smooth Operation: Currently loaded with AT Engineered bearings or precision bearings in 1.08", 1.25", and 1.5" size wheels for reliable, quiet performance.
- Built for Durability: Available in both steel and 300 series stainless steel versions, designed to stand up to the elements and provide long-lasting strength.
