SKYLIGHTS

Marvel® Motorized Operator

The Marvel System power operator for windows and skylights proves that simpler can be better. Challenged by window and skylight manufacturers with providing a small and sleek motorized system that is simple to install, easy to operate and above all affordable – we are confident that the Marvel system is the answer.

This motorized system is designed for awning windows and skylights that weigh up to 90 lbs. Using a standard 110 volt household current, the Marvel system allows operation of multiple units from one control switch. Marvel motorized operators come with mounting brackets that secure the operator to the center of the window, making this system one of the easiest to install.

product highlights

- Recommended for: aluminum, composite, vinyl, and wood
