SHIPPING SUPPLIES

Shipping Block

This Shipping Block designed to be easily installed and help protect your window hardware until the window is installed. It has been designed to transfer the impact load directly from the sash to the frame protecting hinges and other critical components from damage.

Refer to TechNote#13 for more information on why shipping blocks are important and where they should be placed in your window.

product highlights

- Economical solution for reducing service calls related to shipping and handling damage to the window or hardware
- Protects products from damage during loading, transit and installation
- Designed to fit any window with a 7/16" hinge cavity
- The red tab acts as a visual indicator to remove the block after the window is installed
- Non-handed design
- Easy peel and stick application to any surface
- Can be used on any window profile material: Rigid PVC (Off white) and Flexible PVC (Red)
