Hollow TPE Bulb Seals

This material combines the flexibility of a thermoplastic with the functional performance and properties of a conventional thermoset rubber. Dual durometer kerf barb allows for easy insertion. Compression seal with a bulb diameter of .260"

Flexible bulb acts as a mechanical seal with little resistance. Conforms to the shape of the sealing surface better than a rigid part.

product highlights

- TPE bulb weatherseal
- Designed for a 0.080" kerf
