

Engineered Solutions. Trusted Results.

REACH: 0.275"

PP3365 - (AP427)

Aptus seals are extruded TPEs. This material combines the flexibility of a thermoplastic with the functional performance and properties of a conventional thermoset rubber. Dual durometer kerf barb allows for easy insertion. Slip coat on the top of the bulb decreases operating force in sliding and sweeping applications. Compression seal for a mounting distance between .138" & .250" with a bulb diameter of .275".

Flexible bulb acts as a mechanical seal with little resistance. Conforms to the shape of the sealing surface better than a rigid part.

Product Highlights

- Designed for a 0.080" kerf
- TPE weatherseal - with low friction Pro-Slip
