

## Engineered Solutions. Trusted Results.

REACH: 0.371"

### PP3373

TPE bulb weatherseal. T-slot mounted.

Flexible bulb acts as a mechanical seal with little resistance. Conforms to the shape of the sealing surface better than a rigid part. The T-slot base is made from rigid polypropylene which has a superior column strength, allowing for machine/automated insertion.

Compression seal with a reach of .371"(9.4mm) for mounting distances of .230" to .290" and a bulb diameter of .250"(6.3mm). Slipcoat on top surface of TPE bulb reduces friction in sliding/sweeping applications.

With a backing width of .190"(4.8mm), this T-Slot base works in the majority of PVC and aluminum extrusions. TPE bulb composition is an alternative to textile products in adverse environments.
