HINGES

Butt Hinges

Butt hinges are popular options on round-top and trapezoid style windows - designed to provide maximum egress opening on casement windows. A majority of the hinge itself is concealed within the window's frame creating a more pleasing exterior appearance than is the case with most exposed hinge systems. Hinges provide tamper-resistance when the window is in the closed position by providing concealed mounting. This hinge concept enables the window manufacturer to design a window that is not only easy to install, but is also relatively maintenance free.

product highlights

- High weight capacity
- Can add multiple hinges to increase weight capacity
- Available for both wood and aluminum applications
- Provides for an exterior pivot point for improved egress opening
