LOCKS

25 Series

25 Series lock features a two-piece strike design with a wear-resistant black polyester insert for smooth operation. Inserts are available in various heights to assure tight lock-up. 25 Series locks can withstand at least 300 lbs. of forced entry resistance per locking point. Rotating the handle 90 degrees locks and unlocks the sash. With pole-operated locks, the hole in the handle allows users to operate the lock in elevated areas.

product highlights

- High strength zinc diecast construction
- Trimline and Pole handle styles available Inline and offset bases to fit any profile
- 300 lb load rating per lock point (dependent on keeper used)
- Various pawl lengths give maximum reach to help pull in and seal vent
- Wide range of available keepers
